

# LETTER TO CORONA

Rio de Janeiro, May 2, 2020.

**Dangerous members of the Corona Gang,**

**We didn't expect your visit. You've arrived by surprise causing a global mental confusion. You've brought us a lot of fear, insecurity, loneliness, stress and made us reinvent ourselves. Many of us have been through losses: financial losses, loss of stability, loss of health, loss of plans and especially the loss of our beloved ones. Our compassion goes to all those who are suffering from these losses and this must be registered here.**

**Many of us don't know how to live without hugs and kisses. You have brought a lot of nostalgia to everyone's heart, but we are very good at creating new ways to be together again.**

**We'd also like to take this opportunity to thank you for helping us to value science and health professionals.**

**We didn't expect you to be able to do all of this, but we admit that you've given us a chance to reflect and understand that we have no control over things.**

**You've left us many lessons and you've done everything you had to do. We've learned a lot, but now you can leave.**

**May your end be a beginning of a new world.**

**Goodbye!**
